MINIMUM REVENUE STATEMENT (MRP) 2018-19

Supported Borrowing

The MRP will be calculated using the regulatory method (option 1). MRP will therefore be calculated using the formulae in the old regulations, since future entitlement to RSG in support of this borrowing will continue to be calculated on this basis.

Un-Supported Borrowing (including un-supported borrowing prior to 1 April 2008)

The MRP in respect of unsupported borrowing under the prudential system will be calculated using the asset life method (option 3). The MRP will therefore be calculated to repay the borrowing in equal annual instalments over the life of the class of assets which it is funding. The repayment period of all such borrowing will be calculated when it takes place and will be based on the finite life of the class of asset at that time and will not be changed.

Finance Lease and PFI

In the case of Finance Leases and on balance sheet PFI schemes, the MRP requirement is regarded as met by a charge equal to the element of the annual charge that goes to write down the balance sheet liability. Where a lease of PFI scheme is brought, having previously been accounted for off-balance sheet, the MRP requirement is regarded as having been met by the inclusion of the charge, for the year in which the restatement occurs, of an amount equal to the write-down for the year plus retrospective writing down of the balance sheet liability that arises from the restatement. This approach produces an MRP charge that is comparable to that of the Option 3 approach in that it will run over the life of the lease or PFI scheme and will have a profile similar to that of the annuity method.

MRP will normally commence in the financial year following the one in which the expenditure was incurred. However, when borrowing to construct an asset, the authority may treat the asset life as commencing in the year in which the asset first becomes operational. It may accordingly postpone the beginning to make MRP until that year. Investment properties will be regarded as becoming operational when they begin to generate revenues.
