This paper provides the Audit and Performance Review Committee with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes:

- a summary of emerging national issues and developments that may be relevant to you as a fire and rescue authority; and
- includes a number of challenge questions in respect of these emerging issues which the Committee may wish to consider (these are a tool to use, if helpful, rather than formal questions requiring responses for audit purposes)

Members of the Audit and Performance Review Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications. Click on the Grant Thornton logo to be directed to the website www.grant-thornton.co.uk.

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either your Engagement Lead or Engagement Manager.

Progress to date

Financial Statements Audit

We completed our planning for the 2017/18 financial statements audit and have issued the detailed audit plan, setting out our proposed approach to the audit of the Authority's 2017/18 financial statements.

We carried out our interim audit in January 2018. Our interim fieldwork visit included:

- Updated review of the Authority's control environment
- Updated understanding of financial systems
- Review of Internal Audit reports on core financial systems to date
- Early work on emerging accounting issues
- Early substantive testing

The findings from our interim audit are summarised at pages 6 and 7.

The statutory deadline for the issue of the 2017/18 opinion is brought forward by two months to 31 July 2018. We have discussed our plan and timetable with officers.

The final accounts audit is due to begin on the 2 July with findings reported to you in the Audit Findings Report by the earlier deadline of 31 July 2018.

Value for Money

The scope of our work is set out in the guidance issued by the National Audit Office. The Code requires auditors to satisfy themselves that; "the Authority has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources".

The guidance confirmed the overall criterion as: "in all significant respects, the audited body had proper arrangements to ensure it took properly informed decisions and deployed resources to achieve planned and sustainable outcomes for taxpayers and local people".

The three sub criteria for assessment to be able to give a conclusion overall are:

- Informed decision making
- Sustainable resource deployment
- Working with partners and other third parties

We have carried out our initial risk assessment to determine our approach in January 2018 and reported this to you in our Audit Plan.

We will report our work in the Audit Findings Report and give our Value For Money Conclusion by the deadline in July 2018.

Other areas

Meetings

We met with Finance Officers in December as part of our regular liaison meetings and continue to be in discussions with finance staff regarding emerging developments and to ensure the audit process is smooth and effective

Events

We provide a range of workshops, along with network events for members and publications to support the Authority. Our most recent event was our local government accounts workshop which took on 6 February in Plymouth, which was attended by a member of your finance team. Further details of the publications that may be of interest to the Authority are set out in our Sector Update section of this report.

Audit Deliverables

2017/18 Deliverables	Planned Date	Status
Fee Letter Confirming audit fee for 2017/18.	April 2017	Complete
Accounts Audit Plan We are required to issue a detailed accounts audit plan to the Audit and Performance Review Committee setting out our proposed approach in order to give an opinion on the Authority's 2017-18 financial statements.	April 2018	Complete
Interim Audit Findings We will report to you the findings from our interim audit and our initial value for money risk assessment within our Progress Report.	April 2018	Complete
Audit Findings Report The Audit Findings Report will be reported to the July Audit and Performance Review Committee.	July 2018	Not yet due
Auditor's Report This is the opinion on your financial statement, annual governance statement and value for money conclusion.	July 2018	Not yet due
Annual Audit Letter This letter communicates the key issues arising from our work.	August 2018	Not yet due

Results of interim audit work

The findings of our interim audit work, and the impact of our findings on the accounts audit approach, are summarised in the table below:

	Work performed	Conclusion
Internal audit	<p>We have completed a high level review of internal audit's overall arrangements. Our work has not identified any issues which we wish to bring to your attention.</p> <p>We have also reviewed internal audit's work on the Authority's key financial systems to date. We have not identified any significant weaknesses impacting on our responsibilities.</p>	Our review of internal audit work has not identified any weaknesses which impact on our audit approach.
Entity level controls	<p>We have obtained an understanding of the overall control environment relevant to the preparation of the financial statements including:</p> <ul style="list-style-type: none"> Communication and enforcement of integrity and ethical values Commitment to competence Participation by those charged with governance Management's philosophy and operating style Organisational structure Assignment of authority and responsibility Human resource policies and practices 	Our work has identified no material weaknesses which are likely to adversely impact on the Authority's financial statements
Review of information technology controls	<p>We performed a high level review of the general IT control environment, as part of the overall review of the internal controls system.</p> <p>IT (information technology) controls were observed to have been implemented in accordance with our documented understanding.</p>	Our work has identified no material weaknesses which are likely to adversely impact on the Authority's financial statements

Results of interim audit work (continued)

	Work performed	Conclusion
Walkthrough testing	<p>We have completed walkthrough tests of the Authority's controls operating in areas where we consider that there is a risk of material misstatement to the financial statements.</p> <p>Our work has not identified any issues which we wish to bring to your attention. Internal controls have been implemented by the Authority in accordance with our documented understanding.</p>	<p>Our work has not identified any weaknesses which impact on our audit approach</p>
Journal entry controls	<p>We have reviewed the Authority's journal entry policies and procedures as part of determining our journal entry testing strategy.</p> <p>To date we have undertaken detailed testing on journal transactions recorded for the first nine months of the financial year, by extracting 'unusual' entries for further review. No issues have been identified that we wish to highlight for your attention</p>	<p>Our work to date has not identified any issues which we wish to bring to the Authority's attention. We will complete our detailed testing on journal transactions recorded for the remaining months of the financial year as part of our financial statements audit.</p>
Early substantive testing	<p>We have undertaken early substantive testing of firefighters pensions benefit payments, operating expenses, and property, plant and equipment for the first nine months of the financial year.</p>	<p>Our work to date has not identified any issues which we wish to bring to the Authority's attention. We will complete our sample testing and ensure that related disclosures are appropriate as part of our financial statements audit.</p>

Sector Update

Local government finances are at a tipping point. Local Government bodies are tackling a continuing drive to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider NHS and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit and performance committee members, as well as any accounting and regulatory updates.

- **Grant Thornton Publications**
- **Insights from local government sector specialists**
- **Reports of interest**
- **Accounting and regulatory updates**

More information can be found on our dedicated public sector and local government sections on the Grant Thornton website by clicking on the logos below:

Independent Review of Building Regulations and Fire Safety: interim report

Commissioned by government following the Grenfell Tower fire to make recommendations on the future regulatory system, Dame Judith Hackitt's interim report was published on 18 December 2017. Its purpose is to make recommendations that will ensure we have a sufficiently robust regulatory system for the future and to provide further assurance to residents that the complete system is working to ensure the buildings they live in are safe and remain so. It is examining the building and fire safety regulatory system, with a focus on high-rise residential buildings.

The work of the review to date has found that the current regulatory system for ensuring fire safety in high-rise and complex buildings is not fit for purpose. This applies throughout the life cycle of a building, both during construction and occupation, and is a problem connected both to the culture of the construction industry and the effectiveness of the regulators.

The key reasons for this are:

- Current regulations and guidance are too complex and unclear. This can lead to confusion and misinterpretation in their application to high-rise and complex buildings.
- Clarity of roles and responsibilities is poor. Even where there are requirements for key activities to take place across design, construction and maintenance, it is not always clear who has responsibility for making it happen.
- Despite many who demonstrate good practice, the means of assessing and ensuring the competency of key people throughout the system is inadequate. There is often no differentiation in competency requirements for those working on high-rise and complex buildings.

- Compliance, enforcement and sanctions processes are too weak. What is being designed is not what is being built and there is a lack of robust change control. The lack of meaningful sanctions does not drive the right behaviours.
- The route for residents to escalate concerns is unclear and inadequate.
- The system of product testing, marketing and quality assurance is not clear.

The National Fire Chiefs Council has welcomed the report's findings. The interim recommendations highlight significant fire safety matters that fire and rescue services up and down the country are concerned about, including:

- Clarity of guidance
- Competence of those working on the design, construction, inspection and maintenance of complex and high-risk buildings
- Timing of consultation with fire and rescue services during the build process
- Procedures for the handover of safety information before buildings are occupied; and
- Fire Risk Assessments and the lack of formal qualifications

The Independent Review will now undertake its second phase of work and publish a final report in spring 2018. This will include targeted work in partnership with the sector and other stakeholders.

[Click on the report cover to download and read more.](#)

Labour commits to installing sprinkler systems in all new schools.

Labour says it would close a loophole in current legislation that allows a significant proportion of schools not to install sprinklers as figures show less than one in three have them fitted.

A Labour government would ensure all new schools have sprinkler systems in place as fresh figures show less than one in three schools built or refurbished by central government since 2010 have them installed.

Party officials told *The Independent* that, if elected, Labour would remove a “loophole” in the existing legislation, which they claim allows a significant proportion of schools not to fit sprinklers.

The announcement comes after new figures were disclosed by schools minister Nick Gibb in a response to a written parliamentary question in the Commons this month.

Mr Gibb said that since 2010, of the 260 schools commissioned by the Department for Education (DfE) under phase one of the Priority School Building Programme, 74 (28 per cent) have, or are planned to have, sprinkler systems.

It means the vast majority (72 per cent) of the schools on programme – aiming to rebuild and refurbish schools buildings in the worst conditions across the country – will not have sprinklers in place. The Government hoped that most of the schools would open by the end of 2017.

Sprinklers are currently mandatory in schools in Scotland and Wales, but not in England and Northern Ireland – despite a warning from fire chiefs last year that the Government risks “playing with children’s lives” and called for all new and refurbished schools to have them installed.

Earlier this month, unions also lashed out a decision to rebuild Selsey Academy in West Sussex without sprinklers after the building was almost completely destroyed by a fire in 2016. The Fire Brigades Union said it was “incomprehensible” and said the government was “shockingly cavalier” in its attitude towards fire safety.

Angela Rayner, the Shadow Education Secretary, told *The Independent* that a Labour government would provide £14bn that was needed to bring schools up to a “good standard”.

A DfE spokesperson said: “Schools have a range of fire protection measures and new schools undergo an additional check while being designed. Where sprinklers are deemed necessary to keep children safe, they must be installed.

“Since the Grenfell tragedy we have contacted all bodies responsible for safety in schools and instructed them to carry out checks to identify buildings that may require further investigation.

“We are working closely with the two schools where ACM classing of potential concern has been identified so that the necessary remedial action is taken.”

The DfE added that all new school buildings must be signed off by an independent inspector to certify that they meet the requirements and designed to protect occupants and allow them to escape in the event of a fire.

Existing regulations contain the presumption that new schools should have sprinklers fitted except in cases where buildings are considered to be “low-risk”. Labour says it will alter this to ensure that new-builds must have systems installed.

Fire safety standards need 'immediate' overhaul.

An urgent overhaul of the UK's safety regime is needed as dangerous products continue to cause thousands of potentially deadly fires in homes, according to a consumer watchdog.

In January 2018, the Government launched a new Office for Product Safety and Standards, but it has yet to reveal any plans.

Which? said the response to remove faulty white goods is falling short – with malfunctioning kitchen appliances causing nearly 16,000 fires across the UK since April, 2012.

The consumer group has given ministers 90 days to publish an action plan to set out the “true scale” of product safety risks in the UK as well as the “immediate steps” it will take to prevent further fires.

Faulty goods cause more than 60 fires a week. Washing machines and tumble dryers are the most high-risk, causing 35% of fires between April, 2014 and March, 2016.

Peter Vicary-Smith, of Which? said: “It’s shocking that there are more than 60 house fires every week in the UK because of faulty appliances.

“People will undoubtedly be worried to hear our findings that some of the most common household appliances represent a disproportionate risk of causing a fire due to being faulty.”

Chair of the Business, Energy and Industrial Strategy Committee Rachel Reeves MP said :
“While we welcomed the decision to establish an Office for Product Safety and Standards, we agree the Government must make sure it has real teeth and ensure it leads to more people registering their products, a better recall regime and ultimately a reduction in the number of fires that blight so many homes and put lives at risk.”

More information on the Office for Product Safety and Standards can be found here:

55%

Of Public Sector engagements are Local Government

Our Cost Assurance service line provides Local Authorities with an independent and retrospective audit of their legacy telecommunications and utilities costs incurred during the past 6 years (as per the Statute of Limitation).

We find that there are repeat errors contained within a Suppliers' invoice arrangements – errors that aren't necessarily picked up by the end client. This is due to the fact that they tend to be contained in suppliers' billing systems 'at source' and are much further down the supply chain which the user won't necessarily have visibility of.

We are supported by a comprehensive library of legacy supplier pricing that has been collated since 2011. Our one aim is to ensure that the client has only paid for the services used during the period by:

- ensuring that bills presented by Suppliers' are in line with their contracts and relevant pricing mechanisms
- ensuring the client receives the Supplier refunds where errors have been identified by us
- ensuring consequential savings are identified and implemented immediately for the client

Our Cost Assurance work is based on a contingent-fee model and is supported by PSAA Ltd. Each of our Local Authority engagements include a fee cap to ensure governance and regulatory standards are maintained.

In summary, we are able to bring much needed financial benefit to the sector as well as providing insight into errors that may be prone to repeat offence by suppliers long after our work is concluded.

Public Sector Audit Appointments: Report on the results of auditors' work 2016/17

This is the third report on the results of auditors' work at local government bodies published by PSAA. It summarises the results of auditors' work at 497 principal bodies and 9,752 small bodies for 2016/17. The report covers the timeliness and quality of financial reporting, auditors' local value for money work, and the extent to which auditors used their statutory reporting powers.

The timeliness and quality of financial reporting for 2016/17, as reported by auditors, remained broadly consistent with the previous year for both principal and small bodies. Compared with 2015/16, the number of principal bodies that received an unqualified audit opinion by 31 July showed an encouraging increase. 83 principal bodies (17 per cent) received an unqualified opinion on their accounts by the end of July compared with 49 (10 per cent) for 2015/16. These bodies appear to be well positioned to meet the earlier statutory accounts publication timetable that will apply for 2017/18 accounts.

Less positively, the proportion of principal bodies where the auditor was unable to issue the opinion by 30 September increased compared to 2015/16. Auditors at 92 per cent of councils (331 out of 357) were able to issue the opinion on the accounts by 30 September 2017, compared to 96 per cent for the previous year. This is a disappointing development in the context of the challenging new reporting timetable from 2017/18. All police bodies, 29 out of 30 fire and rescue authorities and all other local government bodies received their audit opinions by 30 September 2017.

The number of qualified conclusions on value for money arrangements has remained relatively constant at 7 per cent (30 councils, 2 fire and rescue authorities and 1 other local government body) compared to 8 per cent for 2015/16. The most common reasons for auditors issuing non-standard conclusions on the 2016/17 accounts were:

- the impact of issues identified in the reports of statutory inspectorates;
- corporate governance issues; and
- financial sustainability.

The latest results of auditors' work on the financial year to 31 March 2017 show a solid position for the majority of principal local government bodies. Generally, high standards of financial reporting are being maintained despite the financial and service delivery challenges currently facing local government.

Changes to the prudential framework of capital finance

The Ministry of Housing Communities and Local Government has updated the Local Authority Investments Guidance and the Minimum Revenue following its publication of consultation responses on 2 February 2018.

A total of 213 consultation responses were received by the MHCLG by the 22 December 2017 deadline from across local government. Following consideration of the responses the Government has:

- made some technical changes to the Investments Guidance and MRP Guidance
- amended proposals relating to useful economic lives of assets
- implemented the Investments Guidance for 2018-19, but allowed flexibility on when the additional disclosure first need to be presented to full Council
- deferred implementation of MRP Guidance to 2019-20 apart from the guidance “Changing methods for calculating MRP”, which applies from 1 April 2018.

Key changes are noted below.

Statutory Guidance on Local Authority Investments

Transparency and democratic accountability – the revised guidance retains the requirement for an Investment Strategy to be prepared at least annually and introduces some additional disclosures to improve transparency. However, as the changes to the CIPFA Prudential Code include a new requirement for local authorities to prepare a Capital Strategy, the revised guidance allows the matters required to be disclosed in the Investment Strategy to be disclosed in the Capital Strategy.

Principle of contribution – the consultation sought views on the introduction of a new principle requiring local authorities to disclose the contribution that non-core investments make towards core functions. Authorities’ core objectives include ‘service delivery objectives and/or placemaking role.’ This clarification has been made to recognise the fact that local authorities have a key role in facilitating the long term regeneration and economic growth of their local areas and that they may want to hold long term investments to facilitate this.

Introduction of a concept of proportionality – the Government is concerned that some local authorities may become overly dependent on commercial income as a source of revenue for delivering statutory services. The consultation sought views on requiring local authorities to disclose their dependence on commercial income to deliver statutory services and the amount of borrowing that has been committed to generate that income. A majority of respondents supported the introduction of a concept of proportionality, recognising the importance that local authorities make decisions based on an understanding of the overall risk that they face.

Borrowing in advance of need – by bringing non-financial investments (held primarily or partially to generate a profit) within the scope of the Investments Guidance, the consultation proposals made it clear that borrowing to fund acquisition of non-financial assets solely to generate a profit is not prudential. The Investment Guidance requires local authorities who have borrowed in advance of need solely to generate a profit to explain why they have chosen to disregard statutory guidance. It is also important to note that nothing in the Investment Guidance or the Prudential Code overrides statute, and local authorities will still need to consider whether any novel transaction is lawful by reference to legislation.

Minimum Revenue Provision Guidance

The consultation sought views on proposals to update the guidance relating to MRP to ensure local authorities are making prudent provision for the repayment of debt.

Meaning of a charge to the revenue account – the Government does not believe that crediting the revenue account is either prudent or within the spirit of the approach set out in the relevant Regulations. For this reason a charge to the account should not be a negative charge.

Impact of changing methods of calculating MRP – the Government does not expect any local authority to recalculate MRP charged in prior years due to the proposed changes in methodology.

Introduction of a maximum economic life of assets – the consultation sought views on setting a maximum useful economic life of 50 years for freehold land and 40 years for other assets. The MRP Guidance will set a maximum life of 50 years, but allow local authorities to exceed this where the related debt is PFI debt with a longer term than 50 years, or where a local authority has an opinion from an appropriately qualified person that an operational asset will deliver benefits for more than 50 years.

CIPFA publications - The Prudential Code and Treasury Management Code

CIPFA have published an updated 'Prudential Code for Capital Finance in Local Authorities'. Key developments include the introduction of more contextual reporting through the requirement to produce a capital strategy along with streamlined indicators.

The framework established by the Prudential Code should support local strategic planning, local asset management planning and proper option appraisal. The objectives of the Prudential Code are to ensure, within this clear framework, that the capital investment plans of local authorities are affordable, prudent and sustainable.

Local authorities are required by regulation to have regard to the Prudential Code when carrying out their duties in England and Wales under Part 1 of the Local Government Act 2003, in Scotland under Part 7 of the Local Government in Scotland Act 2003, and in Northern Ireland under Part 1 of the Local Government Finance Act (Northern Ireland) 2011.

Since the Prudential Code was last updated in 2011, the landscape for public service delivery has changed significantly following the sustained period of reduced public spending and the developing localism agenda. It reflects the increasing diversity in the sector and new structures, whilst providing for streamlined reporting and indicators to encourage better understanding of local circumstances and improve decision making.

The introduction of a capital strategy allows individual local authorities to give greater weight to local circumstances and explain their approach to borrowing and investment. The Code is available in hard copy and online.

CIPFA have also published an updated Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. The Code provides a framework for effective treasury management in public sector organisations.

The Code defines treasury management as follows:

The management of the organisation's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.

It is primarily designed for the use of local authorities (including police and crime commissioners and fire authorities), providers of social housing, higher and further education institutions, and the NHS. Local authorities in England, Scotland and Wales are required to 'have regard' to the Code.

Since the last edition of the TM Code was published in 2011, the landscape for public service delivery has changed significantly following the sustained period of reduced public spending and the developing localism agenda.

There are significant treasury management portfolios within the public services, for example, as at 31 March 2016, UK local authorities had outstanding borrowing of £88bn and investments of £32bn

.The Code is available in hard copy and online.

Financial sustainability of local authorities 2018

This National Audit Office report reviews financial sustainability across Local Government and examines whether the MHCLG, along with other departments with responsibility for local services, understands the impact of funding reductions on the financial and service sustainability of local authorities.

The report concludes that current pattern of growing overspends on services and dwindling reserves exhibited by an increasing number of authorities is not sustainable over the medium term. The financial future for many authorities is less certain than in 2014, when the NAO last looked at financial sustainability. It also notes that the financial uncertainty created by delayed reform to the local government financial system risks longer-term value for money.

The NAO's view is that the sector has done well to manage substantial funding reductions since 2010-11, but financial pressure has increased markedly since the 2014 review. Services other than adult social care are continuing to face reducing funding despite anticipated increases in council tax. Local authorities face a range of new demand and cost pressures while their statutory obligations have not been reduced. Non-social-care budgets have already been reduced substantially, so many authorities have less room for manoeuvre in finding further savings. The scope for local discretion in service provision is also eroding even as local authorities strive to generate alternative income streams.

Key findings include:

Financial resilience varies between authorities, with some having substantially lower reserves levels than others. Levels of total reserves in social care authorities as a whole are higher now than in 2010-11. However, there is variation in individual authorities' ability to build up their reserves and differences in the rate at which they have begun to draw them down. Some 10.6% of single-tier and county councils would have the equivalent of less than three years' worth of total reserves (earmarked and unallocated combined) left if they continued to use their reserves at the rate they did in 2016-17.

A section 114 notice has been issued at one authority, which indicates that it is at risk of failing to balance its books in this financial year. In February 2018, the statutory financial officer for Northamptonshire County Council issued a section 114 notice, indicating that it was at risk of spending more in the financial year than the resources it has available, which would be unlawful.

MHCLG's work to assess the sector's funding requirements as part of the 2015 Spending Review was better than the work it undertook for the 2013 Spending Review. The Department's advice to ministers in 2015 drew on a more comprehensive evidence base, including data returns from 12 departments.

The government has announced multiple short-term funding initiatives in recent years and does not have a long-term funding plan for local authorities. In 2016-17, the Department offered a four-year settlement to all authorities to enable better financial planning. However, there have been many changes to funding streams outside this core offer. The funding landscape following the 2015 Spending Review has been characterised by one-off and short-term funding initiatives.

There is also uncertainty over the long-term financial plan for the sector. The absolute scale of future funding is unknown until the completion of the next Spending Review. The government has confirmed its intention to implement the results of the Fair Funding Review in 2020-21 and to allow local authorities to retain 75% of business rates. However, the implications of these changes are not yet clear.

There is a lack of ongoing coordinated monitoring of the impact of funding reductions across the full range of local authority services.

49.1%

real-terms reduction in government funding for local authorities, 2010-11 to 2017-18

28.6%

real-terms reduction in local authorities' spending power (government funding plus council tax), 2010-11 to 2017-18

1

number of authorities since 2010-11 where a section 114 notice has been issued that indicates they are at risk of spending more than the resources they have available

Overview of the General Data Protection Regulation (GDPR)

What is it?

The GDPR is the most significant development in data protection for 20 years. It introduces new rights for individuals and new obligations for public and private sector organisations.

What's next?

Many public sector organisations have already developed strategic plans to implement the GDPR, which require policy, operational, governance and technology changes to ensure compliance by 25th May 2018.

How will this affect you?

- ✓ All organisations that process personal data will be affected by the GDPR.
- ✓ The definition of 'personal data' has been clarified to include any data that can identify a living individual, either directly or indirectly. Various unique personal identifiers (including online cookies and IP addresses) will fall within the scope of personal data

What organisations need to do by May 2018

- ✓ Local government organisations need to be able to provide evidence of completion of their GDPR work to internal and external stakeholders, to internal audit and to regulators.
- ✓ New policies and procedures need to be fully signed off and operational.

Organisation Accountability

- Organisations must document their assurance procedures, and make them available to regulators
- Some organisations need to designate a Data Protection Officer, who has expert knowledge of data protection law

Notifications and Rights

- Organisations must notify significant data breaches to regulators within 72 hours
- Organisations must explain to individuals what their rights over their personal information are and how it is being processed and protected

Claims and Fines

- For the most serious data breaches, privacy regulators can impose penalties of up to €20 million on public sector organisations,
- Individuals and representative organisations can claim compensation for infringements of data protection law
