Internal controls Checklist

Use this checklist to evaluate your scheme's internal controls.

Action	Notes	Yes/No
Do you have effective arrangements and procedures to ensure that the pension scheme is being run in accordance with the scheme rules and requirements of law?	See paragraphs 94-112 in the code at www.tpr.gov.uk/code14 . Consider if you need to put further arrangements and procedures in place.	
Do you regularly review the arrangements and procedures?	If yes, how often?	
Do you have a process to identify risks?		
Do you have a process to evaluate risks?		
Do you have in place processes or controls to manage risks?		
Do you have a risk register to record all risks identified and action taken?	See our example risk register at www.tpr.gov.uk/ps-risk-register	
Do you regularly review the risk register?	If yes, how often?	
Do you have a standing item on the pension board agenda to review scheme risks?		

If you have answered no to any of these questions, you should review your processes to ensure that they are fit for purpose.

Completed by _____

Date _____

Note: Public service pension schemes and legislation about the new governance and administration requirements are expected to come into effect in April 2015.

Code of practice no. 14

Governance and administration of public service pension schemes

Managing risks

100. This part of the code covers the requirement for scheme managers to establish and operate adequate internal controls.

Internal controls

Legal requirements

101. The scheme manager of a public service pension scheme must establish and operate internal controls. These must be adequate for the purpose of securing that the scheme is administered and managed in accordance with the scheme rules and in accordance with the requirements of the law.

102. For these purposes ‘internal controls’ means:

- arrangements and procedures to be followed in the administration and management of the scheme
- systems and arrangements for monitoring that administration and management, and
- arrangements and procedures to be followed for the safe custody and security of the assets of the scheme⁵¹.

Practical guidance

103. Internal controls are systems, arrangements and procedures that are put in place to ensure that pension schemes are being run in accordance with the scheme rules (which for most public service pension schemes are set out in the scheme regulations) and other law. They should include a clear separation of duties, processes for escalation and decision making and documented procedures for assessing and managing risk, reviewing breaches of law and managing contributions to the scheme.

104. Good internal controls are an important characteristic of a well-run scheme and one of the main components of the scheme manager’s role in securing the effective governance and administration of the scheme. Internal controls can help protect pension schemes from adverse risks, which could be detrimental to the scheme and members if they are not mitigated.

105. Scheme managers must establish and operate internal controls⁵². These should address significant risks which are likely to have a material impact on the scheme. Scheme managers should employ a risk-based approach and ensure that sufficient time and attention is spent on identifying, evaluating and managing risks and developing and monitoring appropriate controls. They should seek advice, as necessary.

51

Section 249A(5) and s249B of the Pensions Act 2004.

Identifying risks

106. Before implementing an internal controls framework, schemes⁵³ should carry out a risk assessment. They should begin by:
- setting the objectives of the scheme
 - determining the various functions and activities carried out in the running of the scheme, and
 - identifying the main risks associated with those objectives, functions and activities.
107. An effective risk assessment process will help schemes to identify a wide range of internal and external risks, which are critical to the scheme and members. When identifying risks, schemes should refer to relevant sources of information, such as records of internal disputes and legislative breaches, the register of interests, internal and external audit reports and service contracts.
108. Once schemes have identified risks, they should record them in a risk register and review them regularly. Schemes should keep appropriate records to help scheme managers demonstrate steps they have taken to comply, if necessary, with legal requirements.

Evaluating risks and establishing adequate internal controls

109. Not all risks will have the same potential impact on scheme operations and members or the same likelihood of materialising. Schemes should consider both these areas when determining the order of priority for managing risks and focus on those areas where the impact and likelihood of a risk materialising is high.
110. Many pension schemes will already have adequate internal controls in place, some of which may apply to a variety of the functions of the administering authority. Schemes should review their existing arrangements and procedures to determine whether they can prevent and detect errors in scheme operations and help mitigate pension scheme-related risks. For example, schemes could obtain assurance about their existing controls through direct testing or by obtaining reports on controls. Any such review should be appropriate to the outcome of the risk evaluation.
111. Schemes should consider what internal controls are appropriate to mitigate the main risks they have identified and how best to monitor them.

For example, the scheme manager(s) for a funded scheme should establish and operate internal controls that regularly assess the effectiveness of investment-related decision making. Scheme managers for all pension schemes should establish and operate internal controls that regularly assess the effectiveness of data management and record-keeping.

⁵³ See paragraph 25 for the definition of 'schemes'.

Managing risks by operating internal controls

112. Schemes should consider a number of issues when designing internal controls to manage risks. The examples provided are for illustrative purposes only and are not exhaustive. They should not be relied upon as a substitute for the exercise of judgement, based on the principles set out in this code and any advice considered appropriate, particularly in light of any problems experienced in the past.

a. How the control is to be implemented and the skills of the person performing the control

For example, schemes should ensure that new employers participating in the scheme understand what member data are required and the process for supplying it. Where employers fail to supply the correct data or do not follow the correct process, schemes should ensure that the employer identifies the cause of the error and that appropriate action is taken to avoid recurrence, for example remedying a systemic error or providing the relevant training.

b. The level of reliance that can be placed on information technology solutions where processes are automated For example, where scheme administration processes use an automated system, internal or external auditors could audit the system on an annual basis to assess whether it is capable of performing a required function and report any issues that are identified.

c. Whether a control is capable of preventing future recurrence or merely detecting an event that has already happened

For example, schemes should ensure that their systems support the maintenance and retention of good member records. This includes implementing procedures and controls which identify where systems are not fit for purpose, there are gaps in the data, the data are of a poor quality and/or there has been a loss of data.

d. The frequency and timeliness of a control process

For example, schemes should ensure that data are complete. They should undertake a data-cleansing or member-tracing exercise and review this on a regular basis (at least annually or at regular intervals that they consider appropriate for the scheme).

e. How the control will ensure that data are managed securely For example, schemes should ensure that all staff, including temporary or contract staff, complete information management training before they are given access to sensitive data.

f. The process for flagging errors or control failures, and approval and authorisation controls

For example, schemes should ensure that member communications such as member information booklets are reviewed regularly, particularly where there are changes to the scheme. All relevant parties should be aware of how they should flag errors and the authorisation required before any changes are made to the communications.

Monitoring controls effectively

113. Risk assessment is a continual process and should take account of a changing environment and new and emerging risks, including significant changes in or affecting the scheme and employers who participate in the scheme.
114. For example, where relevant, schemes should put in place systems and processes for making an objective assessment of the strength of an employer's covenant (which should include analysis of their financial position, prospects and ability to pay the necessary employer contributions).
115. An effective risk assessment process will provide a mechanism to detect weaknesses at an early stage. Schemes should periodically review the adequacy of internal controls in:
 - mitigating risks
 - supporting longer-term strategic aims, for example relating to investments
 - identifying success (or otherwise) in achieving agreed objectives, and
 - providing a framework against which compliance with the scheme regulations and legislation can be monitored.
116. Internal or external audits and/or quality assurance processes should ensure that adequate internal controls are in place and being operated effectively. Reviews should take place when substantial changes take place, such as changes to pension scheme personnel, implementation of new administration systems or processes, or where a control has been found to be inadequate.
117. A persistent failure to put in place adequate internal controls may be a contributory cause of an administrative breach. Where the effect and wider implications of not having in place adequate internal controls are likely to be 'materially significant', the regulator would expect to receive a whistleblowing report that outlines relevant information relating to the

breach. For more information, see the 'Reporting breaches of the law' section of this code.

118. Ultimately, the legal responsibility for establishing and operating adequate internal controls rests with the scheme manager⁵⁴. Scheme regulations or other documents may delegate responsibilities to pension board members or others – for example identifying, evaluating and managing risks, developing and maintaining appropriate controls and providing assurance to the scheme manager about any controls in place. However, accountability for those controls and the governance of policies, procedures and processes will reside with the scheme manager.

Outsourcing services

119. The legal requirements relating to internal controls apply equally where schemes outsource services connected with the running of the scheme. Providers should be required to demonstrate that they will have adequate internal controls in their tenders for delivering services. The requirements should be incorporated in the terms of engagement and contract between the scheme and service provider. Outsourced services may include, for example, the maintenance of records and data, calculation of benefits and investment management services. Where services are outsourced, scheme managers should be satisfied that internal controls associated with those services are adequate and effective.
120. An increasing number of service providers are obtaining independent assurance reports to help demonstrate their ability to deliver quality administration services. Schemes should ask their service providers to demonstrate that they have adequate internal controls relating to the services they provide. It is vital that schemes ensure they receive sufficient assurance from service providers. For example, the information from providers should be sufficiently detailed and comprehensive and the service level agreements should cover all services that are outsourced. Schemes should also consider including provisions in contracts for outsourced services requiring compliance with appropriate standards. This should help to ensure effective administration.
